Experience

Product Designer @ LogicManager, Inc.

September 2018 - Present

LogicManager is an entrepreneurial firm selling a governance, risk and compliance (GRC) SaaS product. I joined LogicManager as their first and only designer as the company was getting ready to transition from Flash and develop a new app in React. Some things I've done:

- Redesigned user interface for our new app
- Created and maintained atomic design system in Figma
- Prepared Figma specs/Codepen snippets for two scrum teams
- Implemented ui components in the app using Semantic UI
- Implemented usability testing process
- Designed features such as workflows, automation rules, form builder and many more
- Developed a new theme for our help center in Zendesk

Wordpress Developer (Freelance)

May 2018 - Present

Back in college I started working with a few local Boston businesses to improve their websites. Some things I've done:

- Edited current Wordpress theme templates to create more responsive layouts and customized designs
- Wrote new Wordpress themes
- Modified their website structure / SEO to increase and page ranking
- Selected examples: bostonmasstrans.com, superiorskin.net

Education

Brandeis University / Computer Science, B.A.

August 2014 - December 2018
